DURADENT Stainless Steel - Solid		■	■

### Nickel Titanium Heat Activated - THERMADENT™

In addition, Nickel Titanium wire may also demonstrate a heat-activated "Shape Memory" effect produced through a tightly controlled manufacturing process.

THERMADENT™ wires are shape memory, heat-activated wires.

Shape memory properties exhibited by heat-activated, or thermal, Nickel Titanium wires:

- Superb flexibility at room temperature, allowing for even easier ligation. Soft in the hand.
- Very responsive to chilling.
- Gentle forces are initiated by intraoral heat and remain consistent throughout treatment.
- Noticeably more comfortable for the patient due to low forces.
- Allows for patient to control discomfort with cold water rinses.

### Nickel Titanium Superelastic Wire - FLEXADENT™

(NiTi -approximately 55% Ni and 45% Ti):

FLEXADENT™ - Ideal for alignment and leveling in early to mid-stages of treatment. All NiTi wires exhibit a unique "Superelastic" behavior.

Superelastic behavior provides:

- Light to moderate, consistent forces.
- Responsiveness to chilling.
- Near consistent force over a long activation period.
- Greater patient comfort over Stainless Steel wires.
- Excellent resiliency, resulting in high resistance to permanent set.
- High flexibility.
- Leveling, torque, and rotation can be addressed simultaneously early in treatment. No need to treat each of these individually, as is the case if using Stainless Steel wires.

## Choosing The Best Wire For The Application - continued

### Nickel Titanium Wire - PERFECT-Ti™

(NiTi -approximately 55% Ni and 45% Ti):

Your customers will love the **efficiency** of our PERFECT-Ti™ superelastic premium wires! adenta developed this ultra smooth, hard black surface nickel titanium wire engineered specifically for **reduced friction and efficient tooth movement**.

- 30% less friction than traditional Nickel Titanium wire provides improved sliding mechanics.
- Our highest force Superelastic NiTi wire.
- Hard surface is an integral part of the wire; not a coating.
- Black color nearly indistinguishable from other wires when in the mouth.
- Very resilient.
- Ideal for self-ligating brackets.

### CNA BETA III wire - TRIDENT™

(A titanium molybdenum wire composed of 79% Ti, 11% Mo, 6% Zr, and 4% Sn):

The characteristics of our custom designed, nickel-free Beta III Titanium wire make this perfect for use in mid- to late stages of treatment where space closure, rotation, and proper molar relationship are the goal.

- CNA Beta III significantly outperforms TMA Beta III and easily accepts 1st and 2nd order bends without breaking issues.
- Nickel-free! Eliminates treatment concern of nickel sensitivity in patients.
- Excellent formability allows easy fabrication of loops and bends for space closure and tooth movement.
- Easily accepts 1st and 2nd order bends for tipping and aligning.
- Very good resiliency as compared to Stainless Steel.
- Approximately half the tooth-moving force of Stainless Steel.
- Excellent finishing wire.
- Retainer and appliance fabrication is easy with our Beta III CNA™ 14" lengths

### Stainless Steel Solid Wire - DURADENT™

Our archwires are manufactured from medical grade 304V Stainless Steel material (70% Fe, 19% Cr, 9% Ni, 1.5% Mn, 0.5% Si). These archwires can be used throughout treatment but are best suited for mid - to late stages of treatment.

- Superior surface finish.
- Higher force and limited resiliency as compared with Beta III CNA™ wire.
- Forces drop quickly; best suited as a finishing wire.
- Easy to bend.
- Greater patient discomfort when used in early treatment stages.

### Stainless Steel Multi-strand Wire - TWISTADENT™

Adenta's three types of multi-strand wires made of medical grade Type 302SS (71% Fe, 18% Cr, 9% Ni, 1% Mn, 0.5% Si) are well suited for early stages of treatment as well as the finishing stage of detailing and retention. Lower forces and better resiliency than solid Stainless Steel.

- TWISTADENT™ 3-strand (twisted) wire provides moderate forces and limited flexibility.
- TWISTADENT™ Coax (6-strand) wire provides lighter to moderate forces and slightly better resiliency than 3-strand.
- TWISTADENT™ 8-Braid wire provides the lightest forces of the multi-strand Stainless Steel wires, with relatively good resiliency.

#### Packaging Options:

Wire pouch  
5/10/25 wires per pouch

Individual packaging also available in plain white envelopes. Please specify your pouch option when ordering.

Please note: Mushroom and Looped wires are not available in new pouch option.

# Your Adenta Effect SIMPLY BRILLIANT!

## MODEL MAKER

- Exact and standardized study models in **8-10 minutes**
- **Without grinding**
- According to international standards

### 4timeLABTEC

#### SET-UP MODEL MAKER

- Exactly register and duplicate malocclusion and Set-Up models
- Precisely transfer teeth positions to wax models
- Fits all articulator mounting plates

#### OCCLUSAL PLANE REFERENCE

- Precisely create and modify Set-Up models
- Modify models in single millimeter and degree steps
- Fits all articulator mounting plates

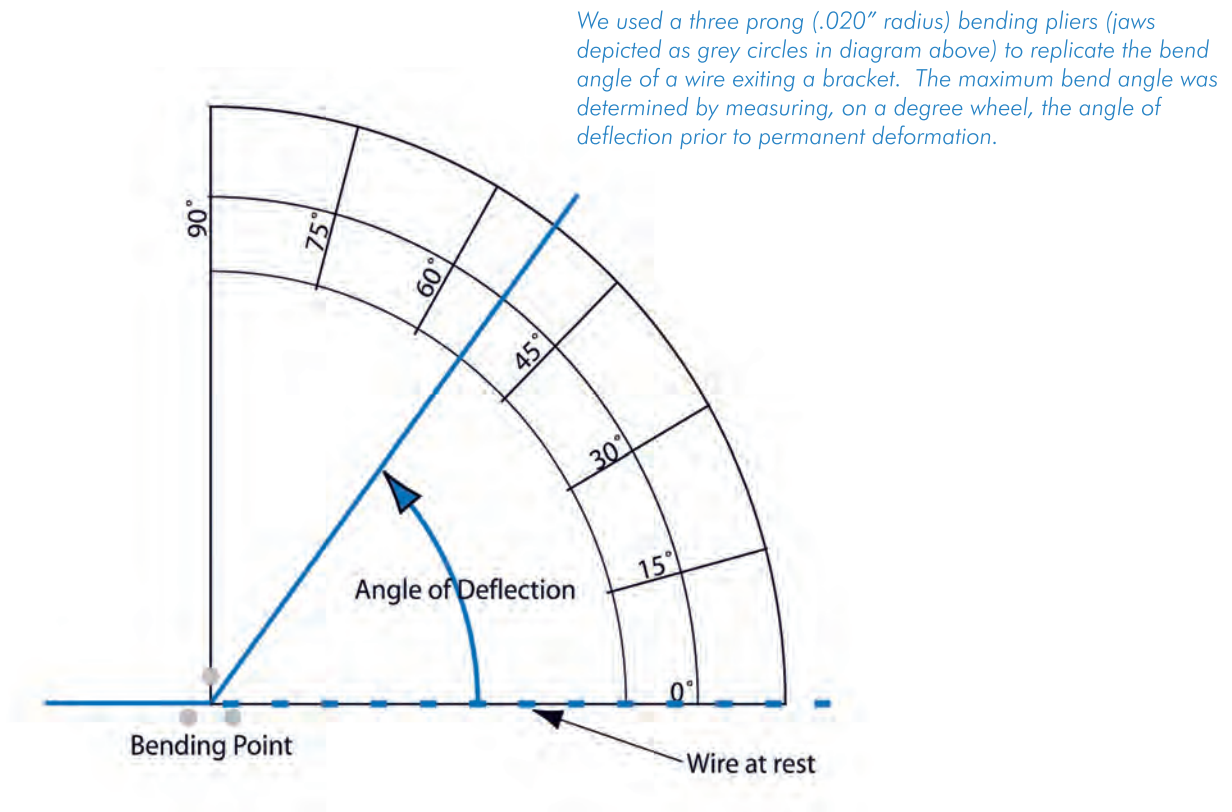

#### SURGICAL MODEL ACCURACY DEVICE

- Precisely and independently modify oral and maxillofacial surgical models
- Modify models in single millimeter and degree steps
- Create exact surgical splints

## Nickel Titanium Maximum Bend Angles

NiTi is so resilient that it is tempting to bend it just a little more: but, how far can it go without being over-stressed and permanent deformations is introduced?

## Maximum Bend Angle Guide

<b>75°</b>	<b>.012</b> wire
<b>70°</b>	<b>.013</b> wire
<b>60°</b>	<b>.014</b> and <b>.014 x .025</b> wire
<b>50°</b>	<b>.016</b> and <b>.018</b> wire
<b>45°</b>	<b>.020</b> , <b>.016 x .016</b> , <b>.016 x .022</b> , <b>.016 x .025</b> , and <b>.017 x .025</b> wire
<b>43°</b>	<b>.018 x .018</b> , <b>.018 x .025</b> , and <b>.019 x .025</b> wire
<b>40°</b>	<b>.021 x .025</b> wire

NOTE: This data is for approximate reference only. Actual bend angles will be dependent upon specifics of a particular case. Actual wire dimension, bracket position, slot edge radius, wire span, and ligating techniques, etc. will all affect maximum bend angle.

## PRODUCT LINE HEAT ACTIVATED WIRES

### ARCHWIRE AVAILABILITY

#### THERMADENT™ HEAT ACTIVATED Nickel Titanium Archwires 35° and 40°

THERMADENT™ is available in two activation ranges:

##### 35°

THERMADENT™ Medium Force is our specially developed heat-activated Nickel Titanium wire with consistent  $A_f$  performance and moderate forces. This is an easy wire to work with being activated at body temperature.

##### 40°

THERMADENT™ Light Force is a heat-activated wire specifically designed for consistent  $A_f$  performance and low tooth moving forces. THERMADENT™ wire provides outstanding resiliency and exhibits true thermal performance at temperatures higher than body temperature.

OBLIGATORY ARCH FORM			OBLIGATORY Wire Diameter		OBLIGATORY Jaw Code	
T3 or T6 or T7 or T8	EURO	E	.012"	12	Upper	U
	NATURAL	N	.014"	14	Lower	L
	STRAIGHT	ST	.016"	16	Upper & Lower	
	SPOOL	SP	...	...	Spool	
			.019" x .025"	19x25		
<div><div>+</div><div>+</div><div>+</div><div>Please refer to the corresponding Archwire Availability to see which Extras are available for your selection!</div></div>						
<div><div>T7 + SP + 175 = T7SP175</div></div>						

**EXAMPLE 1** You would like to order a **7-braid Stainless Steel** archwire on a **SPOOL** with the diameter **.0175**.

**T8 + E + 18x25 + U = T8E18x25U**

**EXAMPLE 2** You would like to order a **8-braid Stainless Steel** archwire in **EURO** Form with the diameter **.018x.025** for the **Upper Arch**.

For Single Packaged Arch Wires please use the same Order Logic as above stated. Please put a "S-" in front of the item number to indicate that you would like to have your wire selection individually packaged.

## ARCHWIRE AVAILABILITY

### LINGUAL ARCH WIRES

	ARCH FORM	Round	Square / Rectangular	pc/Pack
THERMADENT 40°	LINGUAL Form 1, 2, 3, 4	.012 - .014 - .016	.016x.016 - .016x.022 - .017x.025	5
FLEXADENT	LINGUAL Form 1, 2, 3, 4	.014		5
TRIDENT	LINGUAL Form 1, 2, 3, 4		.016x.016 - .016x.022 - .017x.025	5
DURADENT	LINGUAL Form 1, 2, 3, 4	.016	.016x.016 - .018x.018 - .016x.022 - .018x.025	10

## ARCHWIRE ORDER INFORMATION

In order to facilitate your ordering process, you can customize your wire and create your item number by combining the following digits:

### Material Selection + Arch Form + Wire Diameter

OBLIGATORY MATERIAL SELECTION		OBLIGATORY ARCH FORM		OBLIGATORY Wire Diameter	
NiTi Heat Activated	<b>NNT</b>	r = 11.0 mm	<b>L1</b>	.012"	<b>12</b>
NiTi Superelastic	<b>NT</b>	r = 12.3 mm	<b>L2</b>	.014"	<b>14</b>
CNA Beta III	<b>CNA</b>	r = 13.6 mm	<b>L3</b>	.016"	<b>16</b>
Stainless Steel	<b>ST</b>	r = 14.9 mm	<b>L4</b>	...	...
				.019" x .025"	<b>19x25</b>

**EXAMPLE 1** You would like to order a **NiTi Heat Activated** archwire in **LINGUAL Form 3** with an anterior radius of **13.6 mm** with the wire diameter of **.014**.

$$\text{NT} + \text{L3} + 14 = \text{NTL314}$$

**EXAMPLE 2** You would like to order a **NiTi Superelastic** archwire in **LINGUAL Form 3** with an anterior radius of **13.6 mm** with the wire diameter of **.014**.

For Single Packaged Arch Wires please use the same Order Logic as above stated. Please put a "S-" in front of the item number to indicate that you would like to have your wire selection individually packaged.

## FLEXADENT Nickel Titanium Springs

Nickel Titanium's superelastic qualities make it the perfect material for orthodontic springs. With proper usage, NiTi springs are highly resistant to permanent set and provide comfortable, predictable forces during treatment. In comparison, stainless steel springs exert high initial forces, lose force quickly after placement, and will commonly take a permanent set.

### Open Coil Spring

- Made of premium Nickel Titanium wire with variable force.
- Provide continuous forces throughout activation.
- Virtually no permanent deformation with proper usage.
- Wide range of forces available.

NiTi Open Coil Spring		STRAIGHT	SPOOL
Variable Force	.010" x .030"	FONT1	FONTS1
	.012" x .030"	FONT2	FONTS2
	.014" x .036"	FONT3	FONTS3
	.014" x .036"	FONT4	FONTS4
	.014" x .036"	FONT5	FONTS5

7 inch lengths (3 per tube) an 15 inch spools.

### Closed Coil Spring

- Springs are made of premium Nickel Titanium wire with superelastic force.
- Provide continuous retraction forces throughout activation.
- Securely attached, precision designed Stainless Steel Key-end eyelets for easy attachment.
- Recommended activation length is two times original spring length.

NiTi Closed Coil Spring		9mm	12mm	pcs/pack
Super-elastic Force	.009" x .030" - Super Light	FGNTO	FGNTL3	3
	.010" x .030" - Light	FGNT1	FGNTL1	3
	.011" x .030" - Medium	FGNT2	FGNTL2	3
	.012" x .030" - Heavy	FGNT3	FGNTL3	3

### Distalizing Spring

NiTi Distalizing Spring	Light Spool	Medium Spool	Heavy Spool	Light Length	Medium Length	Heavy Length
.009" x .036"	DSSL9x36			DSLL9x36		
.010" x .036"		DSSM10x36			DSML10X36	
.010" x .045"		DSSM10x45			DSML10X45	
.011" x .036"			DSSH11x36			DSHL11X36
.011" x .045"		DSSH11x45				DSHL11x45

7 inch lengths (3 per tube) an 15 inch spools.

### Niti Class II Springs

#### NiTi Class II Spring

10 pieces	.007" x .020"	NTC27X20
	.007" x .024"	NTC27X24
	.007" x .026"	NTC27X26
	.007" x .030"	NTC27X23

## Stainless Steel Auxiliary Products

### SS Extension and Compression Spools

An economical offering, Stainless Steel springs provide high initial forces; however, unlike the forces of our premium Nickel Titanium springs, stainless steel forces of our premium Nickel Titanium springs, stainless steel forces decrease rapidly with tooth movement. Stainless Steel springs are also subject to taking a permanent set when fully compressed or expanded.

40 inch spool

	EXTENSION	COMPRESSION
.010" x .028"		ST-SPC 10x28
.010" x .030"	ST-SPE10x30	ST-SPC10x30
.010" x .036"		ST-SPC10x36

- Extension springs are effective in maintaining space openings.
- Compression springs are most commonly used to create space.

### SS Kobayashi Ties

### SS Ligature Ties

Our Preformed Ligature and Kobayashi products are made of annealed 304 Stainless Steel to ensure consistent shape and predictable performance. Used in place of elastic ligatures, you will appreciate the ease with which they can be placed over the bracket and tied.

#### Stainless Steel Kobayashi Ties

		Long	Short
100 pieces	.010"	ST-KTL10	
	.012"	ST-KTL12	ST-KTS12
	.014"	ST-KTL14	ST-KTS14

#### Stainless Steel Ligature Ties

		Long	Short
1000 pieces	.008"	ST-LWL8	
1000 pieces	.009"	ST-LWL9	
500 pieces	.010"	ST-LWL10	ST-LWS10
1000 pieces	.012"	ST-LWL12	

## Wire Accessories

### SS Crimpable Ball Hooks

Crimpable Stop	Item #
RIGHT- PK 10	SSBHR
LEFT- PK 10	SSBHL
STRAIGHT- PK 10	SSBHS

### Stainless Steel Stop Lock

Description	Item #
STOP LOCK - PK 5	SL
WRENCH	SLW

### SS Crimpable C Stops

Description	Item #
C Stop- PK 10	CSTOP

### SS Crimpable Split Stops

Description	Item #
SPLIT STOP- PK 10	S
